MODULE 03: FINANCIAL ANALYSIS

Lecture Title 06: RISK AND FINANCING

Lecturer: Antoine P. Portelli

Date: 29 January 2025

Undergraduate Diploma in Business Administration

Group Presentations

Each Group will be assigned, by lot, a different Annual Report. The chosen report must be used for the group presentation on Wednesday, 12 February 2025's session.

- Analyse and comment on the financial performance of the company using ratio analysis.
- · Use between 5 and 7 ratios.
- Give the workings at arriving at each of the chosen ratios, indicating from where the financial information was obtained.
- Compare the ratios of the company for this financial year and last year's ratios.
- Research information about the company that you consider relevant to potential new investors.

Assignment Questions

- Assignment Deadline: 20 February 2025
- Approx. 20 hours researching and writing
- Word count: 1,200 words
- You are expected to use the Harvard referencing style
- Presentation is VERY important
- Choose any ONE of the questions

Assignment Questions

Question 1:

Ratio analysis is an important tool to measure and interpret the success of any business. It allows top management to understand the health of the business, and map strategies for the future.

Outline the financial ratios listed hereunder, providing details on how to calculate the ratios. List also, for each ratio, their meaning and use; and their importance and limitations:

- Acid-Test Ratio
- Asset Turnover Ratio
- Average Inventories Turnover Period
- Average Receivables Settlement Period
- Current Ratio
- Earnings per Share
- Gearing Ratio
- Gross Profit Margin
- Return on Capital Employed
- Return on Equity

Assignment Questions

Question 2:

The financial requirements of a business entity differ from one another. In the context of today's realities, provide a critical overview of the requirements based on terms and periods of financial requirement of the business. Provide detailed examples of the various forms of business finance available to a business.

Question 3:

Identify the main internal and external users of accounting information of a business, with special emphasis on the type of information each group requires. Give detailed examples of why the users would require such information, and what limitations, if any, exist in providing such data.

What we covered in Lecture 05

- Liquidity Ratios
- Gearing Ratios
- Investment Ratios
- Management Accounts
- Sources of Finance
 - Short Term
 - Long Term

Liquidity Ratios

 Liquidity refers to the availability of cash in the near future after taking account of immediate financial commitments

Key ratios:

CURRENT RATIO

CURRENT ASSETS

CURRENT LIABILITIES

ACID TEST

CURRENT ASSETS - INVENTORIES

CURRENT LIABILITIES

Gearing Ratios

Non-Current Liabilities

Share Capital + Reserves + Non-Current Liabilities

X 100

Operating Profit before Interest

Interest Payable

Investment Ratios

Total Dividend Paid

Number of shares in issue

Profit after tax

Number of shares in issue

Market value per share

Earnings per Share

Undergraduate Diploma in Business Administration

Management Accounts: The Story behind the Numbers

- Impossible to read numerical tabulations with any accuracy
- Concentrate on main numbers (profits net assets debt- net cash flow movement)
- Major asset movements
- Major changes in group structure
- Major changes in financing
- Prospects for future growth
- Additional information outside accounting statements
- Compare interest paid to loans
- Changes in management

Sources of Finance

- Short-Term Finance
- Long-Term Finance
- Outside Investment at start up phase
- Outside Investment at ongoing phase
- Importance of having adequate finances
- Based on size, type, development phase, scope and purpose of business entity

Short Term Finance Types

- Overdraft facility
- Short-term Loan
- Trade Credit
- Leasing

Long Term Finance Types

- Long Term Loan
- Bonds
- Equity

SOURCES AND USES Of SHORT - TERM & LONG - TERM FUNDS

BUSINESS FINANCE

Today's Agenda

1

Risk

Business Cycle

Risk

- Risk appetite of Business
- Lowest: Debt vs. Equity
- Lowest: Short-term vs. Long-term
- Flexible terms vs. Fixed term
- Collateral vs. Provisions
- Dividends vs. Interest

Timing of Finance requirements

- At what stage is the business?
- Small business less risky than large ones.
- Large businesses to be more established
- Stable earnings vs. Forecast profits
- Type of project to be financed
- Private investors get involved if business is large and established public call

Undergraduate Diploma in Business Administration

Business Lifecycle

A firm typically goes through 5 stages in its life cycle: start-up, growth, maturity, decline, and closing.

The business life cycle.

- Each stage presents unique problems, opportunities, and funding requirements.
- Business life cycles vary considerably. Some firms go through the early stages fairly rapidly and then settle into maturity for a long time, while others skip to the closing stage in a few years.
- Some estimates predict that roughly 60% of businesses that employ others besides the owners will close within their first 6 years.
- The life cycle approach is a useful way to discuss financing opportunities and sources for businesses.

Start-Up and Growth

6 sources of Capital

- Personal funds
- 2. Borrowed funds from family and friends
- 3. Commercial bank loans
- Borrowed funds through business start-up programs
- Angel financing or venture capital
- 6. Enterprise Investment Schemes

Angel Financing & Venture Capital

- usually businesses that would not qualify for commercial bank loan
- Angel investors wealthy individuals and groups providing initial funding for high-risk ideas. They typically have very short loan investment horizons (less than 10 years) and upside limits of about \$2 million.
- Venture capitalist firms or funds fund highrisk projects, but have longer time horizons and higher funding limits. They generally provide the funding in stages.

Undergraduate Diploma in Business Administration

Differences between Angel Investors and Venture Capitalists

Angel Investors	Venture Capitalists		
Individual or group of individuals	Corporate entities		
Invest own money	Invest pooled money from range of investors		
Focus on early stages of business	All stages		
Investment may be tied to individual or group expertise	Investment may be tied to high-growth opportunities, with focus on technology and innovation

CCC+ Coat Substantial risk high-yield or 'junk' bonds CCC Cas2 In poor standing CCC-Caa3 CC Cal Extremely speculative May be in default Default

What is equity capital?

Ordinary shares

- Ordinary shares represent the equity share capital of the firm
- Share in the rising prosperity of a company
- Owners of the firm
- The right to exercise control over the company
- Vote at shareholder meetings
- A right to receive a share of dividends distributed
- Each shareholder entitled to a copy of the annual report
- No agreement between ordinary shareholders and the company that the investor will receive back the original capital invested
- What ordinary shareholders receive depends on how well the company is managed

Preference shares

- Preference shares usually offer their owners a fixed rate of dividend each year
- However if the firm has insufficient profits the amount paid would be reduced, sometimes to zero
- The dividend on preference shares is paid before anything is paid out to ordinary shareholders
- Preference shares are part of shareholders' funds but are not equity share capital
